

Dear Parent or Guardian,

This letter is to inform you about an important international study of student learning being conducted in our school this spring. The Progress in International Reading Literacy Study (PIRLS) provides important information for benchmarking student performance in reading in the United States against countries around the world. Since 2001, PIRLS has measured worldwide trends in student reading skills at grade 4. The next PIRLS assessment will be in the spring of 2016.

Our school has accepted an invitation from the National Center for Education Statistics (NCES), part of the U.S. Department of Education, to participate in the PIRLS main study. {Insert number} of our 4th grade classes will take part. {This/One of these} is your child's class. The enclosed summary sheet provides some background information about PIRLS, explains what is involved for each student selected to participate in the study, and gives a contact phone number and email address where you can find answers to any questions you might have.

To have an accurate picture of what U.S. 4th graders can do in reading, it is important that each student selected take part in the study. In addition to answering reading questions, students will be asked to complete a brief questionnaire about themselves. For the first time PIRLS will also include an innovative assessment of online reading called *ePIRLS*. Your child's class may also be selected to participate in *ePIRLS*. I urge you to support this effort by encouraging your child to take part; however, participation in this study is entirely voluntary. Previous experience suggests that students actually enjoy taking part, and participating students will receive a small gift, which we think they will like.

All of the information collected is safeguarded, as required by law. NCES is authorized to conduct this study under the Education Sciences Reform Act of 2002 (ESRA, 2002; 20 U.S.C. § 9543). Under that law, the data provided by schools, staff, and students may be used only for statistical purposes and may not be disclosed, or used, in identifiable form for any other purpose except as required by law (20 U.S.C., § 9573). Students and schools are never identified in any reports. All reported statistics refer to the United States as a whole.

Thank you for taking the time to learn about this important study.

Sincerely,

[School official]
